Councilmember Faulconer Announces Community Forum for Those Concerned About Navy Fuel Plume

San Diego, CA...To address the recent public notification by the Navy that the fuel leak plume from storage tanks at the Point Loma Naval Base was larger than reported previously, Councilmember Kevin Faulconer has scheduled a public forum to give the community the opportunity to address questions directly to the Navy as well as to state and county public health representatives who are directly involved with the project. This forum will provide the opportunity for neighbors of the base who feel that they have not been adequately informed about the potential impacts of these leaks to get the full story.

According to Councilmember Faulconer, “It is my responsibility as their Councilmember to make sure that people are well informed and that our government is committed to solving this problem as soon as possible. In this case, that means bringing together all of the stakeholders for a discussion of impacts and strategies for remediation.”

The meeting will be held on Monday, march 20th at 7:00 p.m. at the Portuguese SES Hall 2818 Avenida De Portugal in Point Loma. In attendance will be **Kevin Faulconer**, San Diego City Councilmember for District 2, **Susan Davis**, Congresswoman for the 53rd District of California, representatives from the **office of Senator Diane Feinstein.**, **Captain Mark Patton**, Commanding Officer for the Point Loma Naval Base, representatives from the **California Regional Water Quality Control Board**, and members of the **County office of Public Health**.
